

# HUWA-SAN FOGGER

*Disinfects everywhere quickly and effectively*

*Huwa-San® Fogger is a solid, reliable and easy to use whole room disinfection device. It enables users to disinfect walls, floors, ceilings and other surfaces. Huwa-San® Fogger uses Huwa-San 12,5 MD (12,5% H<sub>2</sub>O<sub>2</sub>) and Huwa-San 7,9 MD (7,9% H<sub>2</sub>O<sub>2</sub>) as disinfectant, which meets the highest EN disinfection standards for bactericides, fungicides and virucides.*

The device's excellent disinfection results, its clear digital display and its mobility make Huwa-San Fogger® the most intuitive and user-friendly option on the market today.

## Stop Infection From Spreading

Science has shown that hospital acquired infections (HAI's) are not only transferred by other patients, but also by healthcare personnel or transmitted by water or air. The immediate environment of the patient can also be an important source of nosocomial infections and cross infections. Many micro-organisms (bacteria, but also viruses and spores) causing these infections (including MRSA & COVID-19) are known to contaminate the hospital environment and survive on dry surfaces for days, weeks and even months.

Contamination of frequent touch surfaces in healthcare settings are therefore an important source of viral transmission. Huwa-San Fogger®'s unrivaled performance will help in the prevention of further spread which is crucial to stop an outbreak and to control an infectious thread.

## ADVANTAGES

-  Efficient, fast, simple room disinfection technology
-  Specially for surfaces that are high touch, low touch and surfaces that are difficult to reach
-  Can be applied proactive, scheduled or in case of an outbreak
-  Effective at ambient temperature and standard humidity
-  Excellent material compatibility
-  Eco-friendly » no residual (only water (H<sub>2</sub>O) and oxygen (O<sub>2</sub>))

DISINFECT

Medical support

## KEY BENEFITS

Clinically proven action

Effective bactericide, fungicide, virucide & mycobactericide

No-rinse application

Disinfects high touch - low touch surfaces

Effective against coronaviruses

Leaves no odour and no colour

## TECHNICAL SPECIFICATIONS

HUWA-SAN® FOGGER			
<b>GENERAL</b>			
Model/Type reference	Huwa-San® Fogger	Tank Capacity	1l
		Liquid	Huwa-San TR-12,5 / 12,5 MD and Huwa-San TR-7,9 / 7,9 MD
Housing	Mixed materials: plastic case and metal sheets (IP20)	Bottle identification	Yes – RFID tag
Nozzle type	Venturi	Display	5 Inch Resistive Touch Screen (800x480)
Connection to mains supply	Detachable power cord	CE-certification	Yes
<b>SPECIFICATIONS</b>			
Voltage	230V AC	Weight of the equipment	Device without nozzle head, bottle and power cord: 9950g
Frequency	50Hz		Nozzle head: 540g
Dimensions of the equipment	376x278x414 mm		Power cord: approx. 310g
Equipment mobility	Portable device		
<b>OPERATIONS</b>			
Operating conditions	Continuous	Process recordable	No
Disinfection method	Cold fogging	Warranty	2 years
Maximum room size	142 m <sup>3</sup>	Monitoring	Disinfection time
Timer	Countdown
